

Delivering the Promise of Cross-Platform Communications

and compatibility with everything from smart phones to trunked radios regardless of manufacturer - **NOW!**

- Near 100% Land-Mass Coverage
- Rapid Deployment for Mission Critical Applications
- Interoperable with LTE, VoLTE, and other Push-to-Talk Radios
- Efficient Use of Frequencies through Spectrum Sharing Technology
- Seamless and Directed Smartphone Integration (BYOD)
- FCC Compliant. Meets All 2022 Coverage Milestones

Advanced Yet Affordable

Critical communications with state of the art features like noise-cancelling technology at a fraction of the cost.

Century Airwaves is a consortium of telecommunications companies that have banded together to address the ongoing needs to replace existing radios (P-25) along with the redefinition of FirstNet under AT&T. It is time that radios be able to talk to each other, have 100% land mass coverage, LTE voice, data, broadcasting (eMBMS) capabilities at an affordable price. With **Century Airwaves** that time is **NOW!**
